The Independent Curriculum is a new curriculum implemented in Indonesia. Jiwan 1 Public High School, Madiun Regency, in implementing the independent curriculum, it raises perceptions or responses from teachers and students. This research aims to: 1) describe teachers' perceptions of the independent curriculum for studying history subjects, 2) describe students' perceptions of the independent curriculum for studying history subjects, 3) describe the differences in teachers' and students' perceptions of the independent curriculum for learning history subjects. The research method used is qualitative research with a case study approach. Data was obtained from observations, interviews and documentation studies. Data validity uses source triangulation. The research results show: 1) Teachers' perceptions of the independent curriculum are very helpful in the learning process. Teachers are given the freedom to choose learning tools according to students' needs and teachers can increase the quality of knowledge about the independent curriculum; 2) Students' perceptions of the independent curriculum can motivate them in learning, because learning is varied so that students do not feel bored and can increase their enthusiasm for learning; 3) The independent curriculum creates perceptions for both teachers and students. Teachers' perceptions of the independent curriculum are influenced by the teacher's knowledge and experience, thus influencing their perceptions of the independent curriculum, while students' perceptions of the independent curriculum are influenced by students' experiences while studying the independent curriculum. Students feel that the independent curriculum is very helpful in the learning process. The perceptions of teachers and students give rise to differences in the perceptions of the two. This difference in perception is normal and can be used as evaluation material for the future.
