The aim of the research was to determine the influence of Board of Commissioners Independence and the Audit Committee towards Financial Performance with Managerial Ownership as a Moderating Variable. The data used was secondary data in the form of Annual Reports of State-Owned Enterprises (BUMN) for the 2018-2022 period which were downloaded via the company's official website. The population of this research was all state-owned companies listed on the Indonesia Stock Exchange (BEI) for the 2018-2022 period with a total of 24 companies. The sampling technique used a purposive sampling method with outlier data so that a sample of 89 data was obtained. Data analysis techniques used linear regression analysis and Moderate Regression Analysis (MRA). Data was processed using the SPSS program. The results of the research show: independent commissioners have no effect towards financial performance (ROE), audit committees have no effect towards financial performance (ROE), managerial ownership was unable to moderate the influence of board of commissioners independence towards financial performance, and managerial ownership is unable to moderate the influence of audit committees towards financial performance.
