ABSTRACT

Vira Monika Candra Apriska. 2025. Development of Flipbook Science Media on the Material of the Form of Matter and Its Changes for Grade IV Students of SDN 02 Josenan. Thesis. Elementary School Teacher Education Study Program, FKIP, Universitas PGRI Madiun. Advisor (I) Dr. Heny Kusuma Widyaningrum, M.Pd. Advisor (II) Dr. Ivayuni Listiani, M.Pd.

This study aims to develop interactive Flipbook Media as an alternative learning material on the form of matter and its changes for grade IV elementary school students. Through the ADDIE development model, a flipbook is produced that is equipped with an interesting background, video and images, as well as student worksheets (LKPD). The results of validation by material experts, media, and teachers show that the flipbook is feasible to use. This study concludes that flipbook media is effective in improving the quality of learning material on the form of matter and its changes.
