CHAPTER V

CONCLUSION AND SUGESSTION

A. Conclusion

From the result and discussion above, researcher conclude that,

1. Women used more intensifier language features. The use of intensifier is the way women express their statement with the strong emotions and heavily stressed of their words.

2. Men used more swearing and taboo words language features. The use of swearing and taboo words is the way men express their emotion using impolite, rude, and inappropriate words.

3. Women that used language features of men show more swearing and taboo words. The use of this features when women express their emotion of disappointment, madness, and upset about something.

B. Suggestions

Based on the result of the research, there are some suggestion for the next researchers who are interesting in doing similar research. This research will give the contrition to the types of language features of women and men characters that found in the movie and also the function of language feature of men that women used. This research is showing the differences about women language that found any impoliteness. The next researcher can do further deepen research on the men language features that used by women in

the movie, such as the reason and meaning about any swearing and taboo language that used by women in this study.
