Penelitian ini bertujuan menganalisis penyebab perbedaan pemberian keringanan pidana bagi *justice collaborator* di Indonesia berdasarkan perspektif Gustav Radbruch. Penelitian ini menerapkan metode hukum normatif dengan pendekatan perundang-undangan, konseptual, kasus, serta perbandingan hukum. Hasil penelitian mengindikasikan bahwa regulasi tentang *justice collaborator* di Indonesia belum memiliki parameter yang tegas mengenai pengurangan hukuman, yang berakibat pada ketidakselarasan putusan. Ditinjau dari teori Gustav Radbruch, kondisi tersebut belum sepenuhnya memenuhi nilai keadilan, kemanfaatan, dan kepastian hukum. Perbandingan dengan model *Collaboratore della Giustizia* di Italia menunjukkan pentingnya pengaturan yang lebih jelas mengenai syarat, perlindungan, dan penghargaan bagi *justice collaborator*. Oleh karena itu, diperlukan reformasi regulasi untuk mewujudkan kepastian dan keadilan hukum yang lebih baik.

*This study aims to analyze the causes of disparities in granting sentence reductions to justice collaborators in Indonesia from the perspective of Gustav Radbruch. This research employs a normative legal method with statutory, conceptual, case, and comparative law approaches. The findings indicate that the regulation of justice collaborators in Indonesia does not yet provide clear parameters regarding sentence reductions, resulting in disparities in judicial decisions. From Gustav Radbruch's perspective, this condition has not fully reflected the values of justice, legal expediency, and legal certainty. A comparison with the Collaboratore della Giustizia model in Italy demonstrates the importance of clearer regulations concerning the requirements, protection, and rewards granted to justice collaborators. Therefore, regulatory reform is necessary to achieve greater legal certainty and justice.*
